

Genre Classification Project Data Appendix

The unit of observation for these data is a particular musical track/song. Additionally there are no missing values to report in these data for any of the following variables, and some, given they contain text data of a wide variety, do not work readily with simple visualization techniques.

Variable Details:

Artist_name:

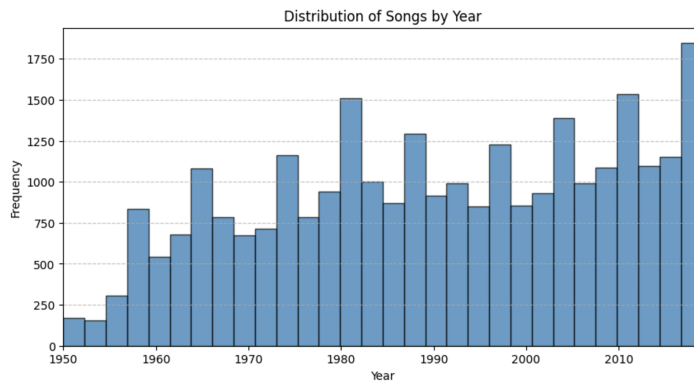

- Name of the artist/group performing the song
- Potential Response: “The Rolling Stones”

Track_name:

- Title of the song/track
- Potential Response: “Gimme Shelter”

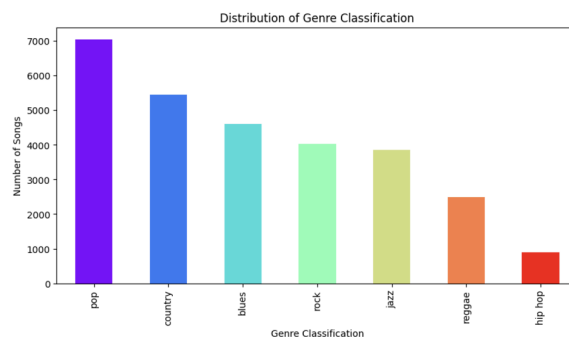

Release_date:

- The year the song was released spanning from 1950 to 2019

Genre:

- The genre classification of the song

Lyrics:

- The most significant lyrics of the song (avoids copyright infringement/redundancy)
- Potential response: ooooooh ooooooh ooooooh threatening life today shelter yeah gonna fade away children shot away shot away children shot away shot away sweep street today burn like coal carpet bull lose children shot away shot away children shot away shot away tell sister kiss away...
- Any visualization would be overwhelmed by the variety and scale of this variable which contains most of the text data.

Len:

- Number of lyrics (based on the number of unique lyrics collected by Mendeley)
